EXPERIENCE

Independent IT Support Technician | 2021–Present

- Diagnose and troubleshoot Windows operating system, hardware, software, and peripheral issues.
- Troubleshoot basic networking and connectivity issues, including Wi-Fi and device configuration.
- Recommend hardware upgrades and software solutions to improve system performance, reliability, and usability.
- Install and configure operating systems, software applications, computer components, and peripherals.
- Provide technical guidance to users, explaining solutions and troubleshooting procedures in clear, accessible language.
- Build, upgrade, repair, and configure desktop computers based on user requirements, performance needs, and budget.
- Identify technical problems, investigate possible causes, and implement appropriate solutions.

PROJECTS

Printer & iPhone Connectivity Troubleshooting

- Applied systematic troubleshooting techniques to identify potential causes and resolve technical issues.
- Investigated and troubleshot printer and iPhone connectivity and encryption-related issues.
- Diagnosed configuration and device communication problems, tested potential solutions, and worked to restore expected functionality.

MP3 & MP4 Media Converter

- Used iterative troubleshooting to identify and address software issues during development.
- Developed an application with AI-assisted programming to convert digital media files between MP3 audio and MP4 video formats.
- Explored file conversion workflows, media formats, and application functionality through development and testing.

AI-Assisted Resume & PDF Editor

- Applied problem-solving and iterative testing to refine application functionality and improve usability.

- Developed a desktop application using AI-assisted programming to create, edit, save, and export resumes as PDF documents.
- Implemented document management and PDF generation functionality to streamline resume creation and formatting.
